September 2019 September Newsletter

Welcome!

Welcome to the “Monogenic Minute”, the newsletter of the University of Chicago Monogenic Diabetes Registry!

Your continued participation in the Monogenic Diabetes Registry is greatly appreciated. Whether it’s completing an annual follow-up survey, updating your contact information, or referring other family members with diabetes, your involvement is truly the fuel for our studies.

We hope you enjoy this issue of the Monogenic Minute. We welcome any suggestions for future issues in the years to come, as we hope to stay connected with all of you who make the Monogenic Diabetes Registry possible!

Thank you for attending the 2019 Monogenic Diabetes Family Forum!

Were you unable to attend? **[Check out some of the presentations here!](#)**

This year, we had 106 people from 29 different families attend the meeting in Oak Brook, IL. Through educational sessions and one-on-one physician appointments we learned more about how to diagnose, manage, and advocate for monogenic forms of diabetes. We also completed research resulting in 22 fNIRS sessions, 33 neurodevelopment assessments, 2 standardized meals, 4 blood draws, 3 dried blood spot cards, 5 cups of urine, and many surveys!

Would you like to connect with other families that are diagnosed with a similar gene mutation as you? Please [contact our team here](#) to be enrolled in our email-based discussion group.

Update: Monogenic Diabetes Registry

Over 1,830 families, with over 900 confirmed monogenic diabetes diagnoses are currently enrolled in our Registry, the largest atypical diabetes database in the United States. [Learn more here.](#)

Do you want to participate in our new and ongoing studies? [Find out more here.](#)

Do you have a question for the investigators?
